IBIX Informationssysteme GmbH
a company presents itself

our business activities...

extend from software through terminals and ID Cards and all services which are necessary for successful projects such as the following:

- project management, consulting, installation and end-user training.
- technical consulting, installation planning, installation of the terminals, integration into existing networks.
- revision of master software and development of custom software
- flexible hardware and software maintenance
- helpdesk for professional customer support and post installation service

our customers...

represent a broad range of industries: Financial institutions, retail, manufacturing, pharmaceutical, government and other service providers. Our clients range from small firms employing 25 people to large corporate customers with over 10,000 people.

our partners...

we cooperate with well known partners. Therefore we offer our customers high-quality hardware at an attractive prize/function relation.

Especially in access control projects the effective collaboration with planners and electricians has been our standard business practice for many years.

our history

For over 20 years we have supported our customers in the time economy and access control. Since 1997 we have been active succesfully in the market as an independent company:

- In 1997 startup of the company
- In 1999 management buyout
- In 2001 first system for LINUX
- In 2003 new product IBIX@flex
- In 2004 IBIX*MSS Selfservice
- In 2006 IBIX*PEP manpower plan
- In 2007 product PegaSys offline door-components added
- In 2008 barriers and spiders added
- In 2010 KEMAS depot systems added
- In 2011 member in the BHE
- In 2013 Integration of Fingerprint-solution from PCS Systemtechnik
- In 2014 Integration of KABA Evolo offline door-components via Cardlink

our solutions...

span from from simple access control and time&attendance solutions to complex access control, visitor data capture, ID card production, cafeteria billing, personnel time management, PEP and integration with SAP.

IBIXflex®

... is our modular staff management system. A client / server-solution with:

- access control with visitor and foreign companies management, zones and sluices and a graphic access monitor
- personnel time management with overtime and premium determination, absence from work management and interface to payroll systems
- display tableau
- employee selfservice as a web browser application with workflow
- personnel deployment planning
- cafeteria data acquisition with integration of machine sales
- ID card production
- integration in SAP module HCM (HR)

to your security

We are a member in the BHE, the german organisation of the manufacturers and builders of access systems.
